

The project “Climate Change Mitigation Through a Sustainable Supply Chain for the Olive Oil Sector” (OLIVE4CLIMATE- LIFE) is co-funded by the LIFE Programme of the European Commission
Contract Number: LIFE15 CCM/IT/000141

OLIVE4CLIMATE will test and **verify innovative approaches** aimed at the implementation of **climate change mitigation strategies**, which will be demonstrated in olive farms in Italy, Greece and Israel.

The project actions will result in increasing the CO₂ sinks versus sources and therefore **reduce the climate impact of olive production** of the fields tested. The focus of the project lies on the **replicability** of the techniques developed, which will assure their **uptake by olive farmers and oil producers** and will result in an even larger reduction of CO₂ emissions.
